Design and Technology at St. Joseph's Catholic Primary School

Our philosophy for effective teaching and learning in Design and Technology is firmly based on research evidence and follows a mastery approach, where pupils acquire a deep, long-term, secure and adaptable understanding of the subject.

By the end of Key Stage 2, our pupils will have had the opportunity to design and create products from each of the following areas within the curriculum; mechanisms and mechanical systems, food, electrical systems, textiles and structures.
