Our Science Subject Leader

My Name is Miss Hinawski and I am the Science Subject Leader.

My passion / personal experience with my subject

What do you love about this subject, and what is your history with it?

I have loved Science since Primary school; learning about how the world works and how we fit into the universe has always amazed me. One of my favourite memories from primary school was looking at the planets in our solar system projected in a sky dome. Experience like this really brought Science to life for me and I hope to pass this enthusiasm onto our pupils.

Experiences in Our School

What has happened recently in this subject? What do you do weekly / termly?

We enjoy lots of interesting scientific experiences in our school. All classes regularly work scientifically and participate in science experiments, utilising and improving their research and evidence skills. We also hold exciting Science events, such as the Mad Science Club

Hopes and Goals in my subject

What are you hoping to do this year?

I hope to make Science exciting and memorable in our school. I hope to provide all pupils with knowledge and experiences that will prepare them for the ever-changing modern world where Scientists are needed more than ever! I am looking forward to holding regular whole school 'Little inventor' competitions where we had to design and make a product that would improve our lives.
